A Guide for Local Agencies in Santa Clara County.

Bicycle Technical Guidelines

A Guide for Local Agencies in the Planning, Design and Maintenance of Bicycle Facilities and Bicycle-Friendly Roadways

Prepared by the

Santa Clara Valley Transportation Authority

Adopted September 2, 1999

Revision 1 adopted December 13, 2007

HOW TO OBTAIN THE CURRENT VTA BICYCLE TECHNICAL GUIDELINES (BTG)

The current version of the BTG is available on the VTA website at http://www.vta.org/schedules/bike_information.html. Pages are updated individually as the need arises; individual pages should be downloaded by holders of this manual as needed. Sign up to receive an email notice of future revisions by sending an email to bikes@vta.org.

Revisions to the Board-adopted version of the December 13, 2007 BTG are itemized below.

Date Effective	Page	Section and Topic	Change
No revisions	No revisions	No revisions	No revisions

Form

As in the Highway Design Manual (HDM), the loose-leaf form was chosen for the BTG because it facilitates change and expansion. New guidelines will be issued as pages in the format of this manual; these may consist of additional pages or new pages to be substituted for those superseded.

Reproduction

This document may be reprinted whole or in part from the VTA website cited above for the sole use and purpose of conducting bike-friendly planning and design. If any part of this document is reproduced for this purpose, cite VTA Bicycle Technical Guidelines and the date as the source. No part of this work may be used or reproduced in any form, electronic, graphic, or mechanical, for marketing or other commercial purpose of any public or private agency or entity or for any reason other than that cited above.

BICYCLE TECHNICAL GUIDELINES

TABLE OF CONTENTS

Part I – General Guidance

Chapter 1 Purpose and Policy Guidance

1.1 Organization of Manual.....	1-1
1.2 Who Uses These Guidelines.....	1-4
1.3 Relation to Other Design Manuals	1-4
1.4 Consistency with Existing Policies	1-6

Chapter 2 Bicycle Characteristics

2.1 Defining Optimum, Should and Shall	2-1
2.2 Bicycle User Types	2-1
2.3 Facility Types and Bicycle Users	2-2
2.4 Operating Space of a Typical Bicyclist	2-3

Part II – Technical Guidelines for All Roadways

Chapter 3 Roadway Design Elements

3.1 Roadway and Lane Width	3-1
3.2 Drainage Inlets and Gutters Pan.....	3-2
3.3 Pavement Marking Materials	3-4
3.4 Roadway Surface Obstacles	3-5
3.5 Signage Usage and Design	3-8

Chapter 4 Maintenance and Construction Zones

4.1 Roadway Resurfacing	4-1
4.2 Roadway Patching and Utility Trenching Repair	4-2
4.3 Ponding	4-3
4.4 Sweeping	4-3
4.5 Landscape Maintenance	4-3

4.6 Construction Zones and Detours	4-4
Chapter 5 Intersections and Interchanges	
5.1 Right-turning Conflicts	5-1
5.2 Left-turning Conflicts	5-5
5.3 Freeway Interchanges	5-6
Chapter 6 Signalized Intersections	
6.1 Traffic Signal Timing	6-1
6.2 Traffic Signal Detection	6-5
6.3 Bicycle Signal Heads	6-8

Part III – Technical Guidelines For Bikeways On Roadways

Chapter 7 Bikeways on Major Roads	
7.1 Bike Lanes	7-2
7.2 Wide Curb Lanes	7-9
7.3 Sharrows	7-10
7.4 Shoulders on Rural Roads and State Highways	7-12
Chapter 8 Local Roads as Bikeways	
8.1 Bike Routes and Signed Shared Roadways	8-2
8.2 Bike Boulevards	8-4
8.3 Traffic Calming	8-7

Part IV – Technical Guidelines For Bike-Only Facilities

Chapter 9 Bike Paths and Bike Bridges	
9.1 Bike Paths and Transportation Issues	9-1
9.2 Trail/Roadway Intersections	9-8
9.3 Bicycle/Pedestrian Across Barrier Connections	9-10
Chapter 10 Bike Parking	
10.1 Definitions	10-1

10.2 Class 1 Bike Parking Options.....	10-2
10.3 Class 2 Bike Rack Options	10-6
10.4 Placement Dimensions and Criteria	10-8
10.5 Bike Parking Quantity	10-13
10.6 Bike Parking Policies and Guidelines by Land Use Type	10-15

List of Tables

Table 1-1: Design Standards and Guidance Manuals for Streets and Bikeways.....	1-2
Table 2-1: Bicyclist Type by Skill Level by Trip Purpose	2-1
Table 2-2: Bicyclist Type Versus Facility Type	2-2
Table 3-1: Optimum Bike Lane Widths	3-1
Table 4-1: Optimal Maintenance Frequencies for Roads and Trails	4-3
Table 4-2: Bikeway Closure Evaluation Questions	4-5
Table 6-1: Representative Bicyclist Speeds	6-1
Table 10-1: Bike Locker Variations and Management Strategies	10-2
Table 10-2: Bike Stations/Bike Rooms Management Strategies	10-5
Table 10-3: Bicycle Parking Supply Recommendations	10-14

List of Figures

Figure 2-1: Bicyclist Essential Operating Space	2-3
Figure 2-2: Stationary Bicyclist with Trailer	2-3
Figure 2-3: Bicyclist on Two-Way Path - Essential Operating Space	2-4
Figure 3-1: Bikeway Crossing Skewed Railroad Tracks	3-6
Figure 3-2: Rail Flangeway Filler Options	3-6
Figure 4-1: Wedge Cut for Roadway Resurfacing	4-1
Figure 4-2: Trenching and Compacting Procedures	4-2
Figure 4-3: Bike Detour Plan for Closed Street or Path	4-5
Figure 5-1: Right-Turn Channelization Island	5-2
Figure 5-2 Bike Lane at Free Right-Turn Lane	5-3

Figure 5-3: Double Right-turn Lane	5-4
Figure 5-4: Left-turn Options for Bicyclists	5-5
Figure 5-5: Typical Local Street/Freeway Interchanges	5-6
Figure 5-6: VTA Best Practice Freeway Interchange.....	5-7
Figure 5-7: HDM Figure 1003.2D - Bike Lanes Through Interchanges	5-8
Figure 5-8: Freeway On-ramp with Bike Lane and Exclusive Right-turn Lane: Added Right-turn Lane.....	5-9

FOREWORD

The VTA Bicycle Technical Guidelines (BTG) reproduce many of the Caltrans Highway Design Manual's (HDM) standards and guidelines as well as those from other manuals. The BTG are intended to supplement and augment these manuals, by providing guidance on when and how to better accommodate the many types of bicyclists; to the extent that the Caltrans standard is a "minimum" dimension or practice, this manual presents best practice options for some situations. The VTA "Best Practices" included herein are not a substitute for professional engineering judgment and may not be appropriate for a specific situation. As with the HDM, the BTG is not a substitute for engineering knowledge, experience, or judgment. Reference to and knowledge of the original design manuals is assumed. Since the Highway Design Manual is the primary manual for bikeway design in California, the purpose of the HDM has been reprinted below and is hereby incorporated.

Purpose (from the Foreword to the Caltrans Highway Design Manual)

This manual was prepared by the Division of Design for Project Delivery.

The manual establishes uniform policies and procedures to carry out the highway design functions of the California Department of Transportation (Department). It is neither intended as, nor does it establish, a legal standard for these functions. The policies established herein are for the information and guidance of the officers and employees of the Department. Many of the instructions given herein are subject to amendment as conditions and experience seems to warrant. Special situations may call for variation from policies and procedures, subject to Division of Design approval, or such other approval as may be specifically provided for in the text. It is not intended that any standard of conduct or duty toward the public shall be created or imposed by the publication of the manual. Statements as to the duties and responsibilities of any given classification of officers or employees mentioned herein refer solely to duties or responsibilities owed by these in such classification to their superiors. However, in their official contacts, each employee should recognize the necessity for good relations with the public.
