

BASCOM AVENUE

VTA COMPLETE STREETS: I-880 to Hamilton Project

Project Fact Sheet

Overview

The Santa Clara Valley Transportation Authority (VTA), in partnership with the City of San Jose, the City of Campbell, and the County of Santa Clara, is looking at ways to improve approximately three miles of Bascom Avenue between the I-880 interchange and south toward Hamilton Avenue.

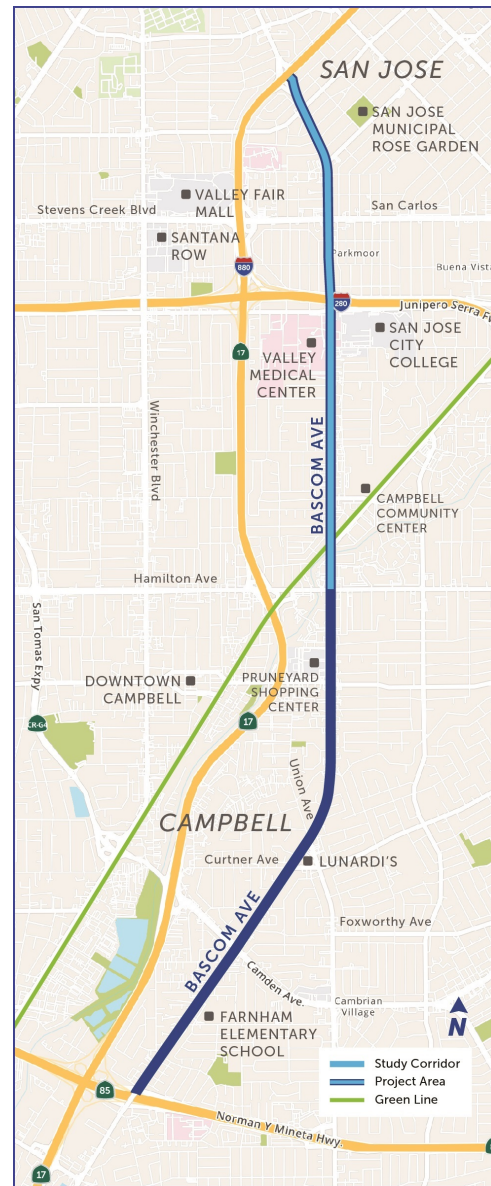

The goal is to enhance pedestrian and bicycle mobility and safety, improve bus and light rail transit accessibility and reliability, improve the street scape, and ensure the roadway serves all modes of transportation.

Bascom Avenue

The Bascom Avenue corridor crosses multiple cities and neighborhoods. The southern half of Bascom Avenue in the project consists of 6-lanes with a center turn lane and occasional landscaped median islands. The roadway serves approximately 27,000 to 37,000 vehicles daily and provides several stops for VTA Bus Route 61 along the corridor.

Outcomes

This effort will result in community-supported street designs for improving Bascom Avenue. The plan will help VTA, and its partner agencies pursue funding to implement street improvements.

Project Schedule

Environmental Clearance
Design and Engineering
Construction

Fall 2022 - Winter 2024
Summer 2023 - Fall 2024
Summer 2025 - Fall 2026

Community Engagement

Local community members are invited to provide input during a series of three sets of meetings and workshops being held during the course of the project. In addition, an on-line survey will be used to gather information.
