Introduction

This document presents the Santa Clara Valley Transportation Authority's (VTA) Proposed Biennial Budget for Fiscal Years 2024 and 2025. The FY 2024 and FY 2025 Proposed Budget provides funding over the next two-year period for the planned activities and initiatives that are consistent with VTA's Strategic Plan Core Values of *Safety, Integrity, Quality, Sustainability, Diversity* and *Accountability*.

The Proposed Biennial Budget for FY 2024 and FY 2025 supports the 2023 Transit Service Plan adopted by the VTA Board of Directors in October 2022. This service plan restores full transit service levels equal to the pre-pandemic 2019 New Transit Service Plan (NTSP) and enhance hours of operation and service frequencies above and beyond pre-pandemic services. The Proposed Budget incorporates major service changes made during the pandemic in response to changing travel market conditions, rider requests, and pandemic developments, while ensuring the service changes made are equitable for most transit-dependent riders.

Additionally, the Proposed Budget provides funding for State of Good Repair (SGR) projects, such as: rehabilitation of VTA's rail infrastructure, overhead catenary system, light rail system elevators and escalators, passenger facilities, and information systems; purchase of electric and hybrid buses to replace those that have exceeded their useful life; and expansion of infrastructure for electric buses and vehicle charging stations.

This Proposed Budget document is divided into sections which cover the eight separate Funds, each of which includes a specific budget to be adopted:

- VTA Transit
- Congestion Management Program
- Silicon Valley Express Lanes Program
- Transit-Oriented Communities Program
- VTP Transportation Program
- 2000 Measure A Transit Improvement Program
- 2008 Measure B BART Operating Sales Tax Program
- 2016 Measure B Program

Each section contains an overview of its respective program, including various schedules and narratives that detail the specific budget proposal.

The following table summarizes the Proposed Budget amount for each program.

Fiscal Years 2024 and 2025 Proposed Budget Summary¹ (Dollars in Thousands)

Fund	Fiscal Year 2024 ²	Fiscal Year 2025
VTA Transit-Operating	601,535	623,577
VTA Transit-Capital	TBD	TBD
Congestion Management Program-Operating	7,187	7,073

VTA Transit

VTA Transit

Overview

On June 6, 1972, state-legislated public transit service began in Santa Clara County. The new transit service was known as the Santa Clara County Transit District (District), which provided county-wide bus transit service under the management of the County of Santa Clara. The District eventually expanded in the late 1980s to include light rail transit service. The District was formally separated from the County in 1995. Following a merger of the District with the Santa Clara County Congestion Management Agency, the name of the new organization was formally changed to the Santa Clara Valley Transportation Authority (VTA) on January 1, 2000.

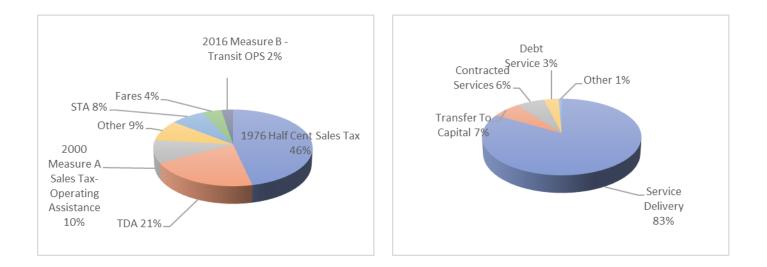

VTA is an independent, state chartered special governmental district responsible for:

- Bus and light rail transit operations
- Regional commuter and inter-city rail services
- Americans with Disabilities Act (ADA) paratransit service
- Congestion management and transportation planning within Santa Clara County
- Specific highway improvement projects

The following proposed FY 2024 and FY 2025 VTA Transit Biennial Budget funds VTA's transit services and capital project delivery plan for the two-year period between July 1, 2023 and June 30, 2025.

The charts below illustrate the sources and uses of funds for the FY 2024 and FY 2025 VTA Transit Biennial Operating Budget.

Where the Dollars Come From Where the Dollars Go

Note: Percentages may not be precise due to independent rounding.

Major Budget Assumptions

Service Levels

In mid-2021, vaccinations against the COVID-19 pandemic became more readily available to the public, allowing for social distancing and masking requirements to be lifted gradually over time. VTA's efforts to return to full pre-pandemic service levels culminated in the VTA Board of Directors unanimously adopting the 2023 Transit Service Plan in October 2022. This updated plan makes slight improvements that adjust to emergent post-pandemic rider needs and re-establishes the full-service levels originally approved in the 2019 New Transit Service Plan (NTSP). During the next two fiscal years, VTA's focus is to stabilize to these new full-service levels and to continue to fulfill the commitment of providing safe, clean, and reliable services for its customers and employees.

The Proposed Budget reflects these agency service priorities over the next two years. Throughout FY 2024 and FY 2025, VTA's transit service will gradually be restored to full pre-pandemic levels as approved by the Board under the 2023 Transit Service Plan. The budget assumes a complete return to full service levels in FY 2025.

The table below compares total service miles and hours for bus and light rail from FY 2021 to FY 2025.

	FY 2021 ACTUAL	FY 2022 ACTUAL	FY 2023 PROJECTED ACTUAL	FY 2024 PROPOSED BUDGET	FY 2025 PROPOSED BUDGET
Service Miles	-				
Bus	14,042	16,450	17,209	18,547	18,964
Light Rail Train	1,463	1,479	2,022	2,208	2,220

Service Levels (In Thousands)

Note: Totals and percentages may not be precise due to independent rounding

<u>Ridership</u>

The COVID-19 pandemic and related social distancing requirements caused unprecedented decreases in transit ridership across the country. Its impacts on ridership are still seen today and are expected to delay ridership growth over the next two years. VTA's FY 2023 ridership is projected to be about 75% of actual ridership in FY 2019 (the last full year *before* the pandemic). Despite the resumption of VTA transit services in line with the NTSP, VTA transit ridership is anticipated to gradually increase from FY 2023. As businesses, government entities, and schools consider continued hybrid work and telecommuting, it is uncertain when transit ridership will make a full recovery to pre-pandemic ridership levels. The higher frequency service on the core network and connecting services to BART are expected to facilitate ridership recovery the fastest. However, the projected FY 2025 ridership is likely to be nearly 12% lower than the actual FY 2019 ridership.

Revenues

<u>Fares</u>

There is no change in the current fare pricing structure proposed at this time.

Sales Tax-Related Revenues

Sales tax-related revenues include proceeds from five different sources that make up over 85% of the operating revenues. Sales tax proceeds are driven by the economy, and because VTA is so reliant on sales tax proceeds, the agency is vulnerable to cyclical downturns in the economy that are outside of the agency's control. Each of the sales tax measures is discussed in more detail as follows.

<u>1976 Half-cent Local Sales Tax</u>

In March 1976, voters approved a permanent half-cent sales and use tax to ensure the continued operation and development of transit service in Santa Clara County. The 1976 half-cent sales tax

receipts in FY 2022 were 17.2% higher than those in FY 2021, and the FY 2023 sales tax receipts are projected to be 6.1% higher than the actual amounts received in FY 2022.

To forecast sales tax in FY 2024 and FY 2025, staff reviewed multiple projection scenarios. The Proposed Biennial Budget reflects projected growth of 2.1% and 3.7% in FY 2024 and FY 2025, respectively, and is based on the 'most likely' scenario provided by Avenu Insights & Analytics, VTA's sales tax consultant.

2000 Measure A Sales Tax - Operating Assistance

In November 2000, Santa Clara County voters approved Measure A, which enacted a half-cent sales tax to be collected beginning April 1, 2006 and continuing for a period of 30 years. A portion of this tax is used to provide operating assistance for VTA Transit. More information on Measure A, including the total appropriations for operating and capital projects, is included in the 2000 Measure A Transit Improvement Program section of this report. The Proposed Biennial Budget maintains the percentage of 2000 Measure A sales tax revenue to be used towards funding VTA Transit operations at 20.75%.

<u> 2016 Measure B – Transit Operations</u>

On November 8, 2016, the voters of Santa Clara County approved 2016 Measure B, a 30-year one-half cent countywide sales and use tax to enhance transit, highways, expressways and active transportation (bicycles, pedestrians and complete streets). The ballot language directs that Transit Operations receive 7.9% of the Sales Tax's Program Tax Revenue. In April 2021, the VTA Board of Directors approved principles mandating that allocations for formula-based programs such as transit operations be made annually.

Although there are four categories of projects included under Transit Operations, only the revenues from the first two categories are included in the VTA Transit operating budget. They are:

- Enhance Frequent Core Bus Network
- Expand mobility services and affordable fare programs for seniors, disabled, students and low-income riders

The Proposed VTA Transit Fund Operating Budget includes \$15.5 million and \$20.3 million in 2016 Measure B funds, respectively, for FY 2024 and FY 2025.

Additional information on the 2016 Measure B Program, including total appropriations for all operating projects is included in the 2016 Measure B Program section of this report.

Transportation Development Act (TDA)

Transportation Development Act (TDA) funds are derived from a quarter-cent sales tax levied by the State on taxable transactions occurring in Santa Clara County. Under the 1971 legislation that created TDA, each county in California could elect to impose a quarter-cent sales tax to be collected by the state Board of Equalization and returned to them on a pro rata basis for public transportation purposes. Subsequent to the enactment of TDA, all 58 counties in California elected to impose such a sales tax within their jurisdictions. The Metropolitan Transportation

Commission (MTC) retains a portion of these funds for administration and approximately 94.5% is returned to the source county (e.g., Santa Clara).

The Proposed Budget assumes \$124.8 million and \$129.7 million which reflects MTC's latest projections. These amounts include a \$9.6 million set-aside, per year, to offset a loss of revenue anticipated following a rule change implemented by the California Department of Tax and Fee Administration (CDTFA). CDTFA administers all sales taxes in California. The ruling changed the allocation of taxes paid by web-based market facilitators to be allocated to the point of delivery as opposed to the point of sale. As a result, web-based sales reported by market facilitators headquartered in Santa Clara County are now allocated to the destination county. VTA has been proactively setting aside funds during an appeal process that was recently decided in favor of the CDTFA. VTA is working with MTC staff and the County of Santa Clara to determine the overall impact of the ruling and identifying potential opportunities to mitigate the impact by accounting for the negative reallocation of sales tax for Santa Clara County over multiple years.

State Transit Assistance (STA)

State Transit Assistance (STA) funds are derived from the statewide sales tax on diesel fuel and appropriated by the California Legislature to the State Controller's Office. That office then allocates the tax revenue, by formula, to planning agencies, such as MTC. Statute requires that 50% of STA funds be allocated according to population to the State's Regional Transportation Planning Agencies (RTPA) and 50% be allocated to public transit operators according to operator revenues from the prior fiscal year. In 2017, Senate Bill 1 (Chapter 5, Statutes of 2017; SB1) augmented funding for the STA Program through a 3.5 percent increase of the diesel sales tax rate.

The Proposed Budget assumes \$45.7 million and \$47.0 million for FY 2024 and FY 2025, respectively, and is based on the latest estimate from MTC.

Federal Operating Grants

The FY 2024 and FY 2025 Proposed Budget for federal operating grants includes \$5.7 million and \$5.9 million, respectively, for the Americans with Disabilities Act (ADA) set-aside and mobility assistance for low-income communities.

Expenses

The FY 2024 and FY 2025 Proposed Budget has total expenses budgeted at \$601.5 million and \$623.6 million, respectively. This represents an increase of 8.5% in FY 2024 compared to the total projected actual expense of FY 2023, and an increase of 3.7% in FY 2025 compared to the total budgeted expense of FY 2024. The largest expense category of the VTA Transit Fund operating budget is labor costs, which account for about 67% of the total expense budget.

Labor Cost

Contracts for four bargaining units were amended in FY 2022 to extend for an additional threeyear term. The expiration dates for each of the bargaining units are listed below:

Bargaining Unit	Expiration Date
AFSCME ¹	April 3, 2025
ATU^2	March 3, 2025
SEIU ³	December 31, 2024
TAEA ⁴	April 3, 2025

The Proposed Budget reflects the wage increases based on currently negotiated contracts.

The table below shows the approved positions agencywide for FY 2022 through FY 2025.

FY 2022	FY 2023	FY 2024	FY 2025				
2,365	2,365	2,391	2,391				

<u>Fuel</u>

The Proposed Budget assumes a cost of \$3.52 per gallon for diesel in FY 2024 and \$3.35 in FY 2025, including taxes and fees. The assumed level of service miles can be found in the Service Level section. It is based on changes in the 2023 Transit Service Plan and reflects 18.5 million miles and 19.0 million miles of service for FY 2024 and FY 2025, respectively. Annual fuel usage is estimated at approximately 3.8 million gallons in both FY 2024 and FY 2025.

<u>Paratransit</u>

In accordance with federal regulations, VTA provides ADA paratransit services to persons who are unable to independently access or navigate VTA's bus or light rail system due to a physical, visual, or cognitive disability. VTA's responsibility to provide ADA paratransit service has been outsourced since 1993. Under VTA's current paratransit service delivery model, *VTA ACCESS*, which began in 2017, services are directly contracted (as opposed to brokered) and the rider fares are reported separately as revenues.

¹ American Federation of State, County, and Municipal Employees, Local 101

² Amalgamated Transit Union, Local 265

³ Service Employees International Union, Local 521

⁴ Transportation Authority Engineers and Architects Association, Local 21

VTA ACCESS provides curb-to-curb and door-to-door service for eligible individuals for trips made within ³/₄-mile of VTA's fixed route transit network at the standard fare of \$4. VTA also offers service for trips within a premium zone extending an additional mile beyond the ³/₄-mile standard zone, at a premium fare of \$16. Paratransit service is offered during the same hours as the corresponding fixed route service. Changes to the fixed route transit network can impact the geographical footprint and service hours of paratransit service.

Paratransit trips are anticipated to increase during the two-year budget period, compared to FY 2023 level, and are projected to be about 60% of the actual number in FY 2019 (the last full year *before* the pandemic). By FY 2025, the number of paratransit trips is forecast to be about 79% of the actual number in FY 2019. The tables below detail the elements of the Paratransit budget and the major operating metrics for this service.

Paratransit Operating Metrics (In Thousands)

Transfer to Capital

The VTA Transit Fund does not have a dedicated local revenue source for capital expenditures. Thus, any capital costs to maintain items to a state of good repair, or to enhance or improve capital projects that are not covered by grants or other outside sources must be funded from the same sources as the Operating Budget, primarily sales tax-based revenues. As part of a proposed balance budget for FY 2024 – 2025, a \$40 million transfer to the Capital Fund for each year is proposed. These funds are anticipated to be part of the Capital programming effort for FY 2026 and FY 2027. While the funding need for capital projects is greater than the amount budgeted, projects have been prioritized to match the available funding.

10-Year Projection

In order to provide a broader picture beyond the two-year budget horizon, the table below shows projected Revenues, Expenses, and Operating Balance through FY 2033 (in millions).

	F	Y 2024	1	FY 2025	I	Y 2026	FY 2027	FY 2028	FY 2029	F	F Y 2030	FY 2031	FY 2032	I	Y 2033
Revenues	\$	603.0	\$	623.6	\$	631.1	\$ 632.0	\$ 648.6	\$ 666.5	\$	683.8	\$ 701.5	\$ 719.6	\$	738.3
Expenses	\$	558. 5	\$	580.6	\$	600.8	\$ 605.0	\$ 626.7	\$ 645.3	\$	661.7	\$ 678.5	\$ 695.7	\$	713.4
Transfer to Capital Fund/Operating Reserve	\$	43.0	\$	43.0	\$	30.3	\$ 27.0	\$ 21.9	\$ 21.2	\$	22.0	\$ 23.0	\$ 23.9	\$	24.9
Operating Balance	\$	1.4	\$	-	\$	-	\$ -	\$ -	\$ -	\$	-	\$ -	\$ -	\$	-

Note: Totals may not be precise due to independent rounding.

Although the Board is approving a Biennial Budget that covers only the next two fiscal years, it is useful to extend projections for a ten-year horizon to examine revenue and expense trends and their impact on the annual operating balance. The projected revenues and expenses through FY 2033 are based on the following:

Revenues

- Sales tax related revenues are projected based on a March 2023 forecast prepared by our sales tax consultant, Avenu Insights & Analytics.
- State Transit Assistance (STA) revenues assume a growth rate of 3.0% for FY 2026 FY 2029 and 2.0% for FY 2030 FY 2033.
- Fare revenues assume a growth rate of 3.0% for FY 2026 FY 2029, and 2.0% for FY 2030 FY 2033.
- Other Revenues assume a growth rate of 3.0% for FY 2026 FY 2029, and 2.0% for FY 2030 FY 2033.

Expenses

- Labor costs for FY 2024 and FY 2025 incorporate the business terms for existing labor agreements but make no assumption for any subsequent increases after the contracts end in FY 2025. Total labor costs are assumed to grow by 3.5% for FY 2026 FY 2029 and 2.5% for FY 2030 FY 2033.
- Non-labor costs are assumed to grow by 3.5% annually for FY 2026 FY 2029 and 2.5% for FY 2030 FY 2033.
- In accordance with the VTA policy on reserves, the forecast assumes to maintain an Operating Reserve equal to 15% of the operating budget for the VTA Transit Fund.
- Any operating balance surplus will be applied to the Capital Fund, shown as Transfer to Capital Fund. This funding serves as the local portion of capital funding, and often serves as the local match for grants requiring a local match.

Capital Program Overview

The VTA Transit Capital Program strives to maintain capital infrastructure; keep VTA assets in a state of good repair; and invest in targeted improvements to improve the safety, security and efficiency of the transit system. In support of these objectives, VTA staff revamped the agency's capital planning and prioritization process to include development and Board adoption of a mid-to long-term comprehensive capital plan called the VTA Strategic Capital Investment Plan (SCIP).

The primary objective of the SCIP process is to enhance the Board's involvement and policylevel input at all phases of the capital budgetary process. It has a 20-year horizon that includes (1) the first six-year period, known as CAP6, consisting of capital projects that are prioritized and fiscally constrained, the first two years of which could become the VTA Transit Biennial capital budget; and (2) the subsequent 14-year projection of capital needs that is neither prioritized nor fiscally constrained. SCIP is intended to be updated every two years as a vanguard of VTA's biennial budgetary process, with the Board adopting the priorities at the onset to guide each renewal process.

The process and methodology defined in the SCIP document provide for projects are scored and ranked using the scoring criteria approved by the Board in September 2020 by the Capital Improvement Program Working Group (CIPWG), which consists of twelve experienced VTA executives and mid-level managers, with at least one representative from each VTA division. The CIPWG's scoring and ranking are used for further prioritization by the Capital Improvement Program Oversight Committee (CIPOC), which is composed of the Division Chiefs and Directors. The group organizes projects by a combination of primary fund source and project management responsibility to streamline the prioritization, and considers additional factors, such as:

- Financial aspects including cost, funding availability, and affordability
- Ability to maximize and leverage external grants and other contributions to minimize VTA's share of funding
- Maximizing retention, or preventing potential loss or reduction of existing external funding
- Integration and sequencing with other current and planned projects
- Completing existing projects
- Current and future operating cost implications

Currently, the FY 2024 and FY 2025 proposed project list is under review, along with the status and need of previously approved and funded projects. Once the project list is finalized, the funding required will be defined by source such as: grants, other external sources, and VTA Transit Fund commitment. The anticipated source to support the VTA Transit Fund portion for FY 2024 and FY 2025 is expected from the re-prioritization of previously approved projects and operating surplus generated from FY 2023 performance. Once finalized, a table will be provided listing each project by category and general funding source.

Capital project appropriations do not expire at the end of the fiscal year and are carried forward until the project is completed. Capital carryover is defined as appropriation that is unspent at the end of the fiscal year. The local share of capital carryover is specifically earmarked for previously appropriated capital needs in VTA's Annual Comprehensive Financial Report.

Congestion Management Program

Congestion Management Program

Overview

Congestion Management Agencies (CMAs) were created in 1990 by Proposition 111 and its accompanying legislation, which required that every county with an urbanized population of more than 50,000 establish a CMA. CMAs were designed to meet the goals of increasing the efficiency of existing transit and roadway systems, planning the best capital improvements to these systems, and improving the local land use decision-making process to support and complement the transportation system investments.

In 1994, VTA was designated as the CMA for Santa Clara County through a Joint Powers Agreement entered into by the 15 cities and the County of Santa Clara. Since January 1, 1995, VTA's Congestion Management Program (CMP) has served as the CMA for Santa Clara County. The CMP, however, is fiscally separate from VTA's Transit Fund, and is funded through:

- Assessments to local jurisdictions (Member Agencies)
- Federal and state planning grants
- Grant program manager administration fees
- State Transportation Improvement Program (STIP) Planning Programming and Monitoring Funds

Fees for services provided.

The FY 2024 and FY 2025 Proposed CMP Budget is a result of a number of inputs including statutory requirements, Board initiated activities, Member Agency requested activities, and staff recommended initiatives regarding federal, state and regional issues. Based on these inputs, the budget reflects major focus on tasks and activities related to coordination and advocacy of funding for local projects, capital project initiatives, state/regional advocacy, land use coordination due to new state mandates, and Member Agency assistance.

Member Agency Fees are based on the fee schedule adopted by the VTA Board in June 2005, which specifies annual increases of 3.5%. The Proposed Budget reflects this increase for both FY 2024 and FY 2025.

Congestion Management Program Member Assessments

Silicon Valley Express Lanes Program

Silicon Valley Express Lanes Program

Overview

In December 2008, the VTA Board of Directors approved the Silicon Valley Express Lanes (SVEL) Program that had been under development since 2003. The approved SVEL Program, as approved, was the result of 18 months of coordination, analysis, and outreach on both technical and policy areas related to implementing express lanes to address congestion levels on highways while also looking towards new solutions to accommodate future growth in travel demand.

The primary objectives of the SVEL Program are to provide congestion relief through more effective use of existing roadways, provide commuters with a new mobility option, and provide a new funding source for transportation improvements including public transit. In line with these objectives, combining VTA's role as a transit service provider and a Congestion Management Agency, the SVEL Program implements a roadway pricing system to provide congestion relief and a new mobility option for some commuters. The roadway pricing system allows commuters not meeting the eligible occupancy level to use the express lanes for a fee. The fee changes dynamically in response to existing congestion levels and available capacity in the carpool lanes. As more commuters choose to use express lanes, this in turn provides for traffic congestion relief in the general-purpose lanes.

Currently, due to limited funding availability, VTA is delivering the SVEL network in phases. VTA has pursued several options to leverage funding for these projects, including obtaining grants and private financing to accelerate the delivery of the SVEL Program. As the SVEL Program becomes more mature, program revenues could become an important funding source to support transit operations, as well as to help address long-term sustainability and equity concerns that hinder travel options in Santa Clara County.

The SVEL Program is comprised of two corridors: the SR 237 corridor between I-880 and SR 85, and the US 101/SR 85 corridor within Santa Clara County up to the San Mateo County line. VTA has legislative authority to implement express lanes on these two corridors within the County. The legislation requires revenues collected within a corridor to be used within the corridor in which the revenues were generated.

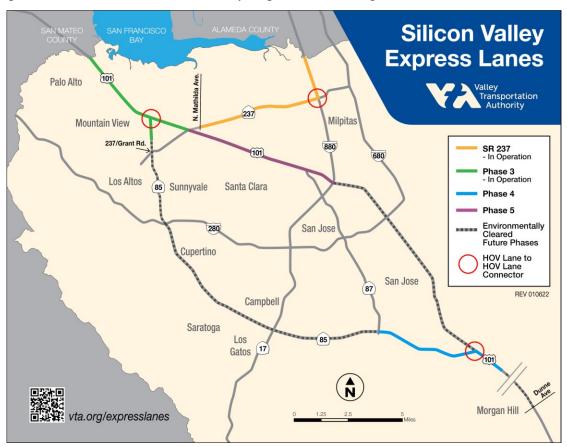

SR 237 Corridor

The SR 237/I-880 Express Connectors project was Phase 1 of the SR 237 Express Lanes project and involved converting existing carpool lane connector ramps at the SR 237/I-880 interchange to express lanes operations. The SR 237 Express Lanes opened for tolling on March 20, 2012.

In September 2017, VTA entered into a loan agreement with Western Alliance Bank (WAB) to provide a \$24 million loan to help fund construction costs to complete the conversion of the remaining carpool lanes on SR 237 to express lanes operations (referred to as the Phase 2 project), pay capitalized interest, and fund issuance costs of the loan. The loan is secured solely by SR 237 revenues from tolls and any other revenues from the operation of the SR 237 Express Lanes. The Phase 2 project extended the express lanes west on SR 237, ending just short of US 101 and opened for service on November 15, 2019.

With the opening of Phase 2, the SR 237 Express Lanes began operating under expanded hours of operation (from 5 a.m. to 8 p.m.) and implemented business rules consistent with the long-term vision for all Bay Area express lanes that includes: the requirement that users carry a transponder, the operation of a video-based toll enforcement system, and a toll discount for Clean Air Vehicles (CAVs). In December 2018, the VTA Board of Directors adopted a toll ordinance for express lanes allowing for the collection of toll violation penalties as well as providing discounted tolls for single occupant CAVs and for two-person carpools where the vehicle occupancy for a carpool is defined as three persons or more.

On October 2, 2020, the SR 237 Express Lanes increased the minimum vehicle occupancy requirement to HOV 3+ in order to be consistent with the I-880 Express Lanes operated by the Bay Area Infrastructure Financing Authority (BAIFA) and managed by the Metropolitan Transportation Commission (MTC). The SR 237 Express Lanes seamlessly connects to the I-880 Express Lanes at the Santa Clara/Alameda Countyline.

The map below illustrates the Silicon Valley Express Lanes Program.

US 101/SR 85 Corridor

The initial phase of the US 101/SR 85 Express Lanes project (referred to as the Phase 3 project) involved converting the existing dual carpool lanes on US 101 and the carpool connector ramps at the US 101/SR 85 interchange in Mountain View to express lanes operations. The Phase 3 project extends from the Santa Clara/San Mateo Countyline to SR 237, including the conversion

of the existing single-lane carpool lane between the US 101/SR 85 interchange and SR 237. The Phase 3 project opened for tolling on February 11, 2022, and seamlessly connects to the US 101 Express Lanes in San Mateo County, which currently extend to the San Francisco International Airport.

SVEL Budget

The Proposed FY 2024 and FY 2025 SVEL Program budget presents the anticipated revenues and expenditures over the next two fiscal years for both the SR 237 Express Lanes and the US 101 Express Lanes (Phase 3). In addition to revenues and expenses presented as part of the budget, information is provided regarding necessary set-asides and reserves that will be used in the future to pay for substantial costs for toll system replacement and roadway rehabilitation, as well as to pay a portion of the cost for construction of future phases of the express lanes, provide funding to VTA transit, and to fund an equity program in order to provide assistance to lowincome residents within the corridor.

For presentation of this Proposed Budget, the revenues, and expenses of both the SR 237 Express Lanes and the US 101/SR 85 Express Lanes are combined. In practice, however, the revenues and expenses must remain segregated by corridor. For express lanes operations, the anticipated expenditures incorporate operations and maintenance (O&M) costs include, but are not limited to: labor, professional and special services (such as toll and violation processing fees, enforcement, electronic toll system maintenance, and Caltrans roadway maintenance), utilities, debt service, and contingency.

Caltrans O&M Agreement

Caltrans is the owner of the state roadway system. Based on its legislative authority, however, VTA is the owner/operator of the express lanes apparatus on SR 237 and US 101/SR 85. VTA has an operations and maintenance (O&M) agreement with Caltrans that requires VTA to reimburse Caltrans for providing roadway maintenance support and roadway rehabilitation for the express lanes, as needed. In addition to funding current maintenance expenses, VTA is setting aside amounts to pay Caltrans for future express lanes pavement rehabilitation along the express lanes corridors.

Set Asides

For FY 2023, the combined SVEL Program is projected to end the fiscal year with a positive operating balance. This operating surplus will be allocated among the various set-asides and reserves as described below, giving priority to reserving for significant future maintenance costs to replace and/or upgrade the tolling system equipment and to reserve for planned future roadway rehabilitation costs that will be owed to Caltrans. Replacement of tolling system equipment and roadway resurfacing are expected to occur every 7 to 10 years. If sufficient funds are available after reserving for the future replacement and rehabilitation, then funds will be set-aside to help fund construction of the next phase of the express lanes. Setting aside express lanes operating surplus to maintain the system and to deliver future phases of the SVEL Program is crucial since there are no other sources of funding to maintain or expand the SVEL system. Regarding system expansion, these funds will likely serve as local match to secure grant funding to fund the construction of future phases, as well as provide match (equity) to obtain a loan or issue bonds as part of the funding plan to construct additional phases. These funds are required to be applied only in the corridor from which they were generated.

In the future, the SVEL program may provide funding to support an equity program. As the VTA SVEL Program matures, funding will be made available to provide assistance to low-income residents using the express lanes. Express lanes operators in the Bay Area are studying how an equity program might be administered.

As the system is expanded and greater funding becomes available from the system, it is a goal of the SVEL Program to begin providing some amount of funding to VTA Transit Operations. VTA, as both a transit operator and the Congestion Management Agency for Santa Clara County, is in a unique position to use the SVEL Program to help support transit to provide travel options that are both sustainable and equitable. This funding could be used to increase service, provide new services, and/or reduce transit fares. To achieve this goal, it is imperative that VTA prioritize the construction of a significant portion of the SVEL Program. Only a mature system will generate sufficient revenue to allow funding to flow to operations and other similar purposes.

Transit-Oriented Communities Program

Transit-Oriented Communities Program

Overview

The VTA Board of Directors, based on staff recommendations, has adopted a Transit-Oriented Communities Policy that establishes an innovative and entrepreneurial real estate development program for Transit-Oriented Development (TOD) projects on VTA-owned sites aimed at increasing transit ridership, catalyzing private TOD on sites around VTA transit centers, and generating long-term revenues. Consistent with the Board of Directors' 2022 policy revision to create a Transit-Oriented *Communities* Policy, VTA has established a larger policy objective to assist local jurisdictions to create privately owned TOD projects and multimodal improvements around transit stations and along transit corridors to establish Transit-Oriented Communities.

Pursuant to Board-adopted Transit-Oriented Communities Policy, VTA has identified 27 sites that constitute a TOD Portfolio with more than 200 acres where VTA seeks to create mixed-use, mixed-income TOD pursuant to long-term ground leases in public-private partnerships with developers. Many of these sites are parking lots or facilities that have a federal interest, due to Federal Transit Administration (FTA) grant funding for the original construction. FTA approval is required for TOD of these sites pursuant to its Circular on Joint Development. Since reactivation of the TOD program in 2016, the Board of Directors has authorized four contracts for TOD projects, and exclusive negotiations for another three TOD projects. Under a Memorandum of Understanding with Santa Clara County for use of 2016 County Measure A affordable housing, based on VTA Board approval of the projects in late FY 2023 and early FY 2024, it is anticipated that construction on up to four affordable housing TOD projects will begin in the next two-year cycle. In total, VTA now has more than 1,600 residential units in preconstruction or pre-development, with 960 of those units affordable to households earning 60% or less of Area Median Income as set forth in VTA's Affordable Housing Policy in the Transit-Oriented Communities Policy.

The FY 2024 and FY 2025 Proposed Budget for the Transit-Oriented Communities Program represents current and anticipated lease revenues, as well as the level of effort (expenditures) required to implement multiple TOD projects with the goal of generating a substantial new long-term revenue source for the Agency, as well as assistance to local jurisdiction on Transit-Oriented Communities. Prior to FY 2012, activities related to the TOD Program were captured solely in the VTA Transit Operating Budget. Based on the anticipated level of future activities, they are now being captured separately and reported in the Transit-Oriented Communities Fund.

The Transit-Oriented Communities Program budget is broken into two major components. The operating budget includes appropriation for program-wide planning and analysis, including support for Transit-Oriented Communities work with local jurisdictions. The capital budget captures costs for site analysis, entitlement processing, developer solicitation, and TOD project agreements for individual VTA TOD sites. The work program is focused on accomplishing close to full build-out of the current portfolio of VTA TOD sites. The current work effort in a given fiscal year reflects the interaction between obtaining entitlements to support TOD project, current market and economic conditions, developer interest, and VTA staff capacity to initiate as well as complete new Transit-Oriented projects.

The table on the following page shows the capital budget appropriation requested for FY 2024 and FY 2025 and is followed by a brief project description, funding sources, and potential operating cost impact. Capital project funding for the two-year period is appropriated in FY 2024 in order to facilitate administration of the program. Capital project appropriations do not expire at the end of the fiscal year and are carried forward until the project is completed.

Description of FY 2024 & FY 2025 Appropriated Project

1. Transit-Oriented Communities and TOD Predevelopment Activities -\$14.16 million

Project Scope

This placeholder project reserves appropriation for various predevelopment and project assistance activities on TOD sites. These activities include, but are not limited to: development feasibility, CEQA (California Environmental Quality Act) analysis, land entitlements, site design, parking and circulation analysis, financial feasibility, legal review, peer review, transactional support, solicitation documentation, and construction management. It also includes the Transit-Oriented Communities Program works, which provide matching grant assistance to local jurisdictions, fund technical assistance, and provide education and community engagement. As expenditure needs are identified, appropriation is reallocated from this placeholder project to the respective site-specific project.

VTP Transportation Program

VTP Transportation Program

Overview

VTP (Valley Transportation Plan) 2040 is the current approved long-range countywide transportation plan for Santa Clara County. Developed by VTA's Congestion Management Program (CMP) and adopted in October 2014, projects must be included in the plan as a pre-requisite for eligibility to receive federal, state, regional, and/or local discretionary fund programming. VTA enters into construction agreements with cities in the county for various projects that are included in VTP 2040. The next update of the long-range countywide transportation plan, VTP 2050, is underway and adoption by the VTA Board is projected for late 2023.

The total appropriation for the identified VTP Transportation Program Capital Projects for FY 2024 and FY 2025 is \$417.4 million, which reflects the planned capital spending to be incurred or committed during the next two years. Project funding for the two-year period is appropriated at the start of the first year to facilitate administration of the program and includes projects related to freeway and highway improvements, express lanes, complete streets, and bicycle/pedestrian improvements.

The table below lists each project and its general funding source category. The subsequent pages provide a brief description of each project, identified funding sources for the FY 2024 and FY 2025 requested appropriation, potential operating cost impacts, estimated total project cost, and anticipated completion date.

Capital project appropriations do not expire at the end of the fiscal year and are carried forward until the project is completed. Capital carryover is defined as appropriation that is unspent at the end of the fiscal year.

VTP Transportation Program Descriptions of FY 2024 & FY 2025 Appropriated Projects

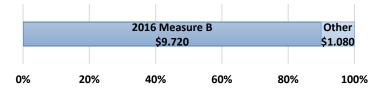

<u>Highways</u>

1. US101/Zanker Road/Skyport Drive/N. 4th Street Interchange Improvement

Project Scope

This project, located in the City of San Jose, will construct a new overcrossing structure above US 101 to connect Zanker Road from the north with North Fourth Street and Skyport Drive to the south, modify US 101 on- and off-ramps, and implement Complete Street facilities to improve access and connectivity for pedestrians and bicyclists.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None

FY 2024 & FY 2025 Request – \$10.8 million **Estimated Total Project Cost** – \$240.0 million **Anticipated Completion Date** – November 2031

2. SR 17 Corridor Congestion Relief

Project Scope

This project constructs a new pedestrian overcrossing and wildlife undercrossing across SR 17 near the Town of Los Gatos, in the vicinity of Lexington Reservoir, for improved safety and trail connectivity.

Funding (in millions)

Business Line(s) Supported

- Delivering Projects and Programs
- Transportation System Management

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$6.5 million **Estimated Total Project Cost** – \$40.0 million **Anticipated Completion Date** – December 2029

3. I-280/Wolfe Road Interchange Improvements

Project Scope

The purpose of this project is to improve traffic operations and safety and to provide facilities for multimodal forms of transportation including bicycle, pedestrian and high occupancy vehicle uses at the I-280 and Wolfe Road interchange in the City of Cupertino.

Funding (in millions)

Business Line(s) Supported

- Delivering Projects and Programs
- Transportation System Management

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$26.04 million **Estimated Total Project Cost** – \$120.0 million **Anticipated Completion Date** – June 2030

4. SR 237/Middlefield Interchange Improvement

Project Scope

This project will modify the SR 237/Middlefield interchange to improve operations and enhance safety for motorists, bicyclists, and pedestrians. The modifications to the interchange, which will be implemented in coordination with Caltrans and the City of Mountain View, will reduce the number of high-risk movements.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Transportation System Management

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$35.56 million **Estimated Total Project Cost** – \$55.0 million **Anticipated Completion Date** – December 2027

5. US 101/SR25 Interchange Improvements – Phase 1

Project Scope

Project will reconstruct the US 101/SR 25 Interchange overcrossing and ramps, located just south of the City of Gilroy, to primarily address the southbound US 101 off-ramp to SR 25 backup onto the mainline. Project will also improve safety by providing access control and improving ramp exit and merging operations, improve connectivity and traffic flow between US 101 and SR 25, and support planned future projects in the interchange area. The requested funds are for additional design, right-of-way, and construction.

Funding (in millions)

Business Line(s) Supported

- Delivering Projects and Programs
- Transportation System Management

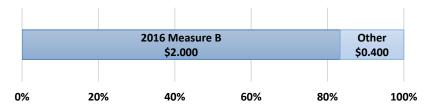

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$25.6 million **Estimated Total Project Cost** – \$130.0 million **Anticipated Completion Date** – September 2028

6. US 101/SR 152/10th Street Interchange Improvements

Project Scope

Project will provide the US 101/SR 152/10th Street interchange in Gilroy to improve traffic operations and facilities for multimodal forms of transportation including bicycle, pedestrian, and high occupancy vehicle uses.

Funding (in millions)

Business Line(s) Supported

- Delivering Projects and Programs
- Transportation System Management

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$2.4 million **Estimated Total Project Cost** – \$58.0 million **Anticipated Completion Date** – December 2030

7. I-880/Montague Expressway Interchange Improvement

Project Scope

Project is to improve traffic operations and provide facilities for multimodal forms of transportation including bicycle, pedestrian, and high occupancy vehicle uses at the I-880 and Montague Expressway interchange in the City of San Jose. The project's improvements include: reconstructing the existing Montague Expressway structure over I-880, constructing new onramps and offramps, modifying existing local street intersections, upgrading bicycle and pedestrian facilities along Montague Expressway, and constructing retaining walls and soundwalls as needed.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$1.75 million **Estimated Total Project Cost** – \$99.0 million **Anticipated Completion Date** – June 2032

8. I-280/Winchester Boulevard Improvements Project

Project Scope

Project will construct improvements in the vicinity of the1-280/Winchester Boulevard Interchange to relieve congestion, improve traffic operations, reduce congestion on the local

roadways, enhance bicycle and pedestrian access and transit connectivity, and provide improved access from northbound I-280 to the project area. Enhancements include constructing a new direct connector ramp from northbound SR 17 to northbound I-280 and constructing a new off-ramp from northbound I-280 that connects to local streets.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$2.25 million **Estimated Total Project Cost** – \$225.8 million **Anticipated Completion Date** – December 2028

9. I-280 Soundwalls

Project Scope

Project constructs over 3,000 linear feet of soundwalls on both sides of I-280 between Los Gatos Creek Bridge and State Route (SR) 87 in San Jose to minimize sound impact from the highway.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$3.56 million **Estimated Total Project Cost** – \$10.2 million **Anticipated Completion Date** – December 2027

10. US 101 De La Cruz/Trimble Interchange Improvements

Project Scope

Project constructs improvements to the US 101/De La Cruz/Trimble Road Interchange to relieve congestion, improve traffic operations, reduce congestion on the local roadways, and enhance bicycle and pedestrian access and transit connectivity. Project includes replacing the existing overcrossing structure over US 101, constructing new onramps and offramps, modifying existing local street intersections, installing Class I bicycle and pedestrian facilities along De La Cruz Boulevard, and constructing retaining walls.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

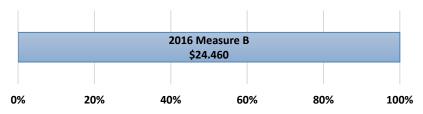

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$1.08 million **Estimated Total Project Cost** – \$76.45 million **Anticipated Completion Date** – November 2024

11. US 101/SR 25 Interchange Phase 2 - Santa Teresa Boulevard Extension

Project Scope

Project constructs, just south of the City of Gilroy, a new two-lane roadway from Santa Teresa Boulevard to just north of Castro Valley Road to the planned US 101/SR 25 Interchange - Phase 1 project to reduce congestion and increase active transportation mobility and connectivity.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

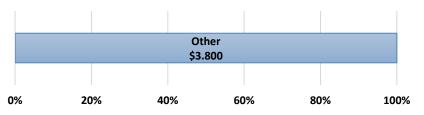

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$24.46 million **Estimated Total Project Cost** – \$30.0 million **Anticipated Completion Date** – February 2028

12. SR 237/Maude Avenue Interchange Improvement

Project Scope

Project modifies the SR 237 and Maude Avenue interchange in the City of Mountain View to reduce congestion, improve safety, and increase active transportation mobility and connectivity. Improvements include modifying the onramps and offramps and incorporating complete street elements including sidewalks, bike ways, and intersection improvements.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$3.8 million **Estimated Total Project Cost** – \$20.0 million **Anticipated Completion Date** – December 2028

13. SR 237/El Camino Real/Grant Road Intersection Improvements

Project Scope

Project will modify the SR 237/El Camino Real/Grant Road intersection to reduce congestion and improve traffic flow and safety. It will also increase active transportation mobility and connectivity.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

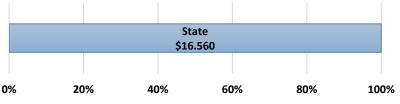

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$2.15 million **Estimated Total Project Cost** – \$6.0 million **Anticipated Completion Date** – December 2028

14. SR 152 Trade Corridor

Project Scope

Project will provide a new toll facility on SR 152 between US 101 and I-5 and includes the realignment of SR 152 between US 101 and SR 156. The purpose of this project is to improve truck/freight movement, air quality, traffic operations, and safety between the Central Valley and the South Bay through the use of truck climbing lanes and a new highway alignment between US 101 and SR 156.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$16.56 million **Estimated Total Project Cost** – \$45.0 million **Anticipated Completion Date** – December 2025

15. SR 237/Caribbean Dr./Lawrence Express Interchange Improvement

Project Scope

Project modifies the SR 237/Caribbean Drive/Lawrence Express interchange in the City of Sunnyvale to reduce congestion and improve traffic flow and safety. Improvements will include, but are not limited to: modify on-ramps and off-ramps; provide multimodal transportation modes and Complete Streets elements including sidewalks and bikeways, intersection improvements, and intelligent transportation system elements as applicable.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$8.5 million **Estimated Total Project Cost** – \$72.0 million **Anticipated Completion Date** – December 2028

16. SR 237 Improvements - Lawrence Expressway to US 101

Project Scope

Project will relieve congestion along SR 237 between Lawrence Expressway and US 101 and improve westbound SR 237 to northbound US 101 and northbound US 101 from SR 237 to Ellis Street traffic flow. Project includes the extending existing high-occupancy vehicle lanes on SR 237 between Lawrence Expressway and US 101.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$5.0 million **Estimated Total Project Cost** – \$20.0 million **Anticipated Completion Date** – June 2026

17. US 101/Ellis St Interchange Improvement

Project Scope

Project modifies the US 101/Ellis Street interchange in the City of Mountain View to relieve congestion and improve traffic operations and safety. Improvements include, but are not limited to: modifying on- and off-ramps, and adding complete streets elements including sidewalks, bikeways, and intersection improvements.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

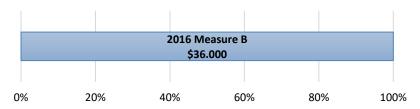

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$3.9 million **Estimated Total Project Cost** – \$25.0 million **Anticipated Completion Date** – December 2028

18. US 101 SB San Antonio/Charleston/Rengstorff Ramp Improvement

Project Scope

Project modifies the US 101 interchanges at San Antonio Road and Charleston Road/Rengstorff Avenue in the cities of Palo Alto and Mountain View to relieve congestion and improve traffic operations on the freeway and local roadways. The scope includes providing a new exit from San Antonio Road to southbound US 101, adding new auxiliary lanes as necessary, modifying existing on and offramps and local intersections, and upgrading bicycle and pedestrian facilities at these two interchanges.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

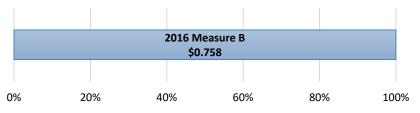

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$36.0 million **Estimated Total Project Cost** – \$192.0 million **Anticipated Completion Date** – December 2028

19. US 101/De la Cruz/Trimble Road Landscaping PEP

Project Scope

Construction of the US 101/De la Cruz Boulevard/Trimble Road interchange in San Jose is underway and expected to be completed in late 2024. Project includes construction of civil infrastructure, landscaping, and first year Plant Establishment Period (PEP). This project is to complete the follow-on two-year PEP required by Caltrans.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$0.76 million **Estimated Total Project Cost** – \$1.8 million

Anticipated Completion Date – December 2026

20. I-680 Sound Walls

Project Scope

Project constructs sound walls on I-680 between Capitol Expressway and Mueller Avenue in San Jose to minimize sound impact from the highway.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$0.1 million **Estimated Total Project Cost** – \$9.5 million **Anticipated Completion Date** – July 2023

21. SR 237/Java Drive Interchange Improvement

Project Scope

Project modifies the SR 237/Java Drive interchange in the City of Sunnyvale to reduce congestion and improve traffic flow and safety. Improvements will include, but not be limited to: Modifying on and off ramps; provide multimodal transportation modes and Complete Streets elements including sidewalks and bikeways, intersection improvements, and intelligent transportation system elements as applicable.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$5.35 million **Estimated Total Project Cost** – \$50.0 million

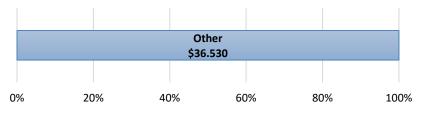

Anticipated Completion Date – December 2030

22. SR 87/Capitol Expressway Interchange Improvement

Project Scope

Project modifies the existing SR 87/Capitol Expressway in San Jose interchange with standard northbound on and off ramps that connect directly to Capitol Expressway instead of Narvaez Avenue.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$36.53 million **Estimated Total Project Cost** – \$43.0 million **Anticipated Completion Date** – December 2026

23. Calaveras Boulevard Widening

Project Scope

This project is to widen the Calaveras Boulevard from Milpitas Boulevard to Abel Street to add a lane in each direction to make it a continuous 6-lane which eliminates bottleneck and improves traffic operations.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$29.6 million **Estimated Total Project Cost** – \$143.5 million **Anticipated Completion Date** – December 2030

Bicycle & Pedestrian

24. Homestead Road Safe Routes to School Improvements

Project Scope

This multi-jurisdictional project upgrades pedestrian and bicycle infrastructure on Homestead Road between Foothill Expressway and Hollenbeck Avenue. The improvements respond to local concerns about youth bicycle and pedestrian safety and include bike paths, separated bike lanes, widened sidewalks, high-visibility crosswalks, curb ramps, and pedestrian and bicycle detection upgrades. The project crosses multiple jurisdictions and includes a section of Homestead Road that has been identified as a potential on-street connection for the planned Stevens Creek Trail.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$13.08 million **Estimated Total Project Cost** – \$18.1 million **Anticipated Completion Date** – June 2027

25. Central Bikeway

Project Scope

Project will design and construct the Central Bikeway, a 10-mile-long bike superhighway that connects the City of Santa Clara, Santa Clara University, Japantown, Guadalupe River Trail, Coyote Creek Trail, and Berryessa BART station in the City of San Jose. The alignment connects disadvantaged communities to important economic areas and provides enhanced safety features including a raised bikeway on sections, raised intersections, protected intersections, and improved signal timing for bikes.

Funding (in millions)

Business Line(s) Supported

- Delivering Projects and Programs
- Transportation System Management
- Faster, Frequent, Reliable Transit

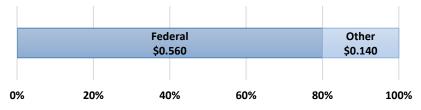

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$10.5 million **Estimated Total Project Cost** – \$213.0 million **Anticipated Completion Date** – June 2033

26. ABC Prioritization & Freeway Ramp Bike/Ped Improvement Plans

Project Scope

Across Barrier Connections (ABC) Prioritization and Freeway Ramp Bike/Ped Improvements Plan will: 1) analyze Caltrans freeway ramps and potential conflicts with Santa Clara County's bicycle and pedestrian network; and 2) analyze ABCs identified in the Santa Clara County Bicycle Plan. The Study will provide recommendations for the most cost-effective and safe solutions to provide a safe, continuous, and high-quality active transportation network at intersections with Caltrans' freeway ramps and identify high-priority locations for new or improved bicycle and pedestrian connections across freeways.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

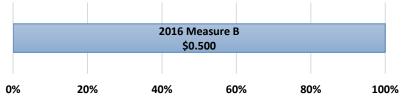

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$0.7 million **Estimated Total Project Cost** – \$0.7 million **Anticipated Completion Date** – June 2025

27. Countywide Bicycle & Pedestrian Education & Encouragement Program

Project Scope

VTA, in collaboration with the Santa Clara County Public Health Department, will provide countywide support and direct services to encourage walking and bicycling, and to educate all roadway users on safe, responsible, and respectful driving, walking, and bicycling. Project will result in three to five countywide education/encouragement efforts to support walking and bicycling. The program will support local education and encouragement efforts, as well as provide some direct services to the general public.

Funding (in millions)

Business Line(s) Supported

• Delivering Projects and Programs

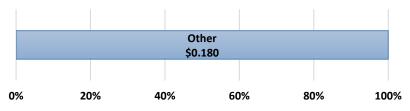

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$0.5 million **Estimated Total Project Cost** – \$2.0 million **Anticipated Completion Date** – June 2029

28. Expressway Bike Superhighway Feasibility Study

Project Scope

VTA, building off of the approved Bicycle Superhighway Implementation Plan, will work with the County of Santa Clara to develop a study to determine the feasibility of installing highquality bikeways that fall into the definition of a bike superhighway along a select number of the County of Santa Clara expressways. The study will include a ranked list of expressways that can accommodate bicycle superhighway facilities, planning-level cost estimates, and 35% design for the top two expressways.

Funding (in millions)

Business Line(s) Supported

- Delivering Projects and Programs
- Transportation System Management

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$0.18 million **Estimated Total Project Cost** – \$0.3 million

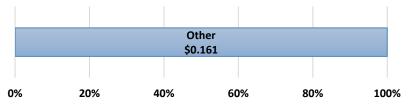

Anticipated Completion Date – June 2025

29. Pedestrian Access to Transit Plan Update

Project Scope

This effort will update the Pedestrian Access to Transit Plan, adopted by the VTA Board in 2017. The update will provide an opportunity to add new priority projects and remove those that have been completed or are no longer a priority. VTA will conduct significant public engagement within the focus areas and work with the community and each respective city to identify the community's needs for making accessing transit easier and safer. VTA will then develop a new plan to be adopted by the Board.

Funding (in millions)

Business Line(s) Supported

- Transportation System Management
- Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$0.16 million **Estimated Total Project Cost** – \$1.14 million **Anticipated Completion Date** – June 2026

30. East Channel Trail Feasibility Study

Project Scope

This multi-jurisdictional study is to determine the feasibility and public perception of building a north-south bikeway trail along the Santa Clara Valley Water District's East Channel between the Bay Trail in northern Sunnyvale to Inverness Way in Cupertino, then traveling south along on-street routes to eventually connect to Joe's Trail along the Union Pacific Railroad in Saratoga.

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$0.19 million **Estimated Total Project Cost** – \$0.36 million **Anticipated Completion Date** – June 2024

Complete Streets

31. Equity Database Platform

Project Scope

The Equity Database Platform is a webtool that makes gathering data based on metrics and measures available for planning projects, construction projects, and other VTA efforts. It aims to develop a digital warehouse for equity related data accessible for all users at VTA and help set guidelines and practices for various departments. It is an opportunity to gather equity data based on race, economy, and history and place it in a web-based support tool which can be used to as a warehouse of information. It is envisioned that in the future it could be used to develop an online tool for Member Agencies and the public.

Funding (in millions)

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$0.35 million **Estimated Total Project Cost** – \$0.35 million **Anticipated Completion Date** – June 2025

32. Affordable Housing Sustainable Communities 5-Year Strategic Plan

Project Scope

Affordable Housing Sustainable Communities (AHSC) is a competitive grant program designed to fund both affordable housing and transportation. VTA and developer partners have secured almost \$40 million to date to fund zero-emissions buses (4) and 135 affordable housing units at the Tamien Station. Nearly all competitive AHSC proposals require the partnership of a local transit partner (VTA) to align transit capital projects with affordable housing infill sites. This program will provide a strategic, systematic approach to maximize the AHSC grant program to VTA by creating a 5-year strategic plan to align VTA resources with future grant applications.

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$0.13 million **Estimated Total Project Cost** – \$0.18 million **Anticipated Completion Date** – December 2024

33. Bascom Complete Corridor Improvements - Phase I (Hamilton Avenue)

Project Scope

Project will design and construct various bicycle, pedestrian, and transit improvements for Phase 1 of the Bascom Avenue Complete Streets Corridor Improvements to relieve congestion and increase safety for transit users, pedestrians and bicyclists, especially school students, seniors, and people with disabilities who use services along Bascom Avenue. Project limits for Phase 1 are between Hamilton Avenue and I-880, approximately 3 miles. Safety for people who walk to bus stops and VTA's light rail station, and pedestrians and bicyclists who use Bascom Avenue, was one of the main concerns received during the public outreach process for the Bascom Complete Streets Study.

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$49.46 million **Estimated Total Project Cost** – \$73.7 million **Anticipated Completion Date** – December 2028

34. Vehicle Miles Traveled (VMT) Evaluation Tool-Logic & Base Data Updates

Project Scope

VTA developed the Santa Clara Countywide Vehicle Miles Traveled (VMT) Evaluation Tool in 2020 to help its Member Agencies evaluate VMT from land use projects to meet the requirements of the new state law, Senate Bill 743. There is now a need to update the VMT Tool to (1) reflect the newly established VMT reduction formulas/logic that are the industry standard for justifying VMT reductions, and (2) incorporate updated VMT base data from the VTA travel demand model. This is important to (A) help ensure use of the VMT Tool by Member Agencies remains legally defensible under the California Environmental Quality Act (CEQA), and (B) extend the useful life of the VMT Evaluation Tool.

Operating Budget Impact – None

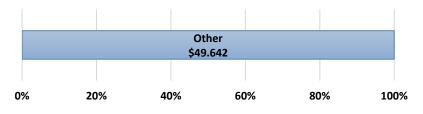

FY 2024 & FY 2025 Request – \$3.99 million **Estimated Total Project Cost** – \$60.0 million **Anticipated Completion Date** – April 2027

36. Silicon Valley Express Lanes - US 101 Phase 5

Project Scope

The US 101 Express Lanes Phase 5 project will continue the implementation of a roadway pricing system on US 101 by converting the existing carpool lane to Express Lane on US 101 (between SR 237 and I-880 interchanges) and add a second Express Lane to create a dual Express Lanes system within this segment of US 101. This project will conform to the existing Express Lanes system recently completed between SR 237 and the Santa Clara/San Mateo County line.

Business Line(s) Supported

• Delivering Projects and Programs

Operating Budget Impact – None **FY 2024 & FY 2025 Request** – \$49.64 million **Estimated Total Project Cost** – \$201.0 million **Anticipated Completion Date** – November 2027

2000 Measure A Transit Improvement Program

2000 Measure A Transit Improvement Program

Overview

The 2000 Measure A Transit Improvement Program – a 30-year plan of major transit improvement capital projects – was approved by Santa Clara County voters in November 2000. The 2000 Measure A Ordinance authorized a 30-year half-cent sales tax that became effective on April 1, 2006, and is scheduled to expire on March 31, 2036. Pursuant to the ballot measure, revenues generated from this tax are limited to the following uses:

- Funding operating and maintenance costs for increased bus, rail, and paratransit service.
- Extending BART from Fremont through Milpitas to Downtown San Jose and the Santa Clara Caltrain Station (BART to San Jose Phase Two).
- Providing connections from Norman Y. Mineta San Jose International Airport to BART, Caltrain, and VTA light rail.
- Extending light rail service from Downtown San Jose to the East Valley.
- Purchasing low-floor light rail vehicles.
- Improving Caltrain with a double-track line to Gilroy and with electrification from Palo Alto to Gilroy.
- Increasing Caltrain service.
- Constructing a new Palo Alto Intermodal Transit Center.
- Improving bus service in major bus corridors.
- Upgrading the Altamont Commuter Express (ACE) service.
- Improving Highway 17 Express bus service.
- Connecting Caltrain with the Dumbarton Rail Corridor.
- Purchasing zero-emission buses and constructing related facilities.
- Developing new light rail corridors.

The 2000 Measure A Transit Improvement Program budget appropriation is broken into two major components: an operating budget and a capital budget. The operating budget includes appropriation for non-project specific expenditures such as professional services, debt service, and operating assistance to VTA Transit. The capital budget appropriation is comprised of the anticipated expenditures and commitments on capital projects for the two-year budget period.

2000 Measure A Capital Program Overview

The Proposed FY 2024 and FY 2025 2000 Measure A Capital Program utilizes both cash-onhand and projected cash receipts, and does not anticipate incurring additional debt in the twoyear period. The total additional appropriation for the identified projects for FY 2024 and FY 2025 is \$2.4 billion. This reflects the planned capital spending that is to be incurred or committed in the next two years. Project funding for the two-year period is appropriated upfront in FY 2024 in order to facilitate administration of the program in both fiscal years. Capital project appropriations do not expire at the end of the fiscal year and are carried forward until the project is completed. Capital carryover is defined as appropriation that is unspent at the end of the fiscal year.

The table below lists each project by category and general funding source. The subsequent pages provide a brief description of each project, identified funding sources for the FY 2024 and FY 2025 requested appropriation, potential operating cost impacts, estimated total project cost, and anticipated completion date.

2000 Measure A Transit Improvement Program Descriptions of FY 2024 & FY 2025 Appropriated Projects

SVRT Program

1. BART Silicon Valley Extension - Phase 2

Project Scope

BSV Phase 2 work to be undertaken in the FY 24/25 timeframe includes: Engineering, right-ofway, and advance utility relocation efforts; the award of the balance of the Tunnel and Trackwork contract; the Newhall Yard, Santa Clara Station, and Parking Garage Project contracts; proceeding with the final design of the stations, related support facilities, and systems contracts.

Funding (in millions)

		deral 83.000		2000 Measure A	2016 Measure B	
	.,			\$400.000	\$471.400	
0%	20%	40%	60%	80	9% 10)0%

Business Line(s) Supported

- Faster Frequent Reliable Transit
- Delivering Projects and Programs
- Transportation System Management

Operating Budget Impact - Ongoing/annual expenditures are covered in the Operations and Maintenance Agreement executed between VTA and BART. 2008 Measure B sales tax proceeds will be the funding source to expense most related costs attributable to VTA.

FY 2024 & FY 2025 Request - \$2.355 billion **Estimated Total Project Cost -** \$9.3 billion **Anticipated Completion Date -** December 2033

Light Rail Program

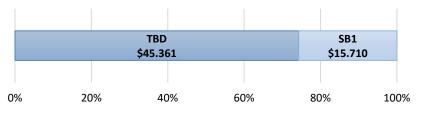

2. Eastridge to BART Regional Connector Project

Project Scope

This project will extend the light rail system to Eastridge Transit Center with a continuous elevated guideway. The Eastridge extension will include light rail transit stations at Story Road

(aerial) and Eastridge (at-grade). Per the current project schedule, construction contracts are expected to be advertised in fall 2023. The FY24 and FY25 budget request will increase the total project budget to equal current estimated total project costs, including design, construction, construction management, utility relocation and property acquisition.

Funding (in millions)

Business Line(s) Supported

- Faster Frequent Reliable Transit
- Delivering Projects and Programs
- Transportation System Management

Operating Budget Impact - The additional track, systems, and station components associated with this expansion will incur additional maintenance costs of approximately \$2.0 million annual transit operating expenditure.

FY 2024 & FY 2025 Request - \$61.1 million **Estimated Total Project Cost -** \$530.0 million **Anticipated Completion Date -** December 2029

2008 Measure B - BART Operating Sales Tax Program

2008 Measure B - BART Operating Sales Tax Program

Overview

On November 4, 2008, the voters of Santa Clara County approved 2008 Measure B, a 30-year one-eighth cent sales and use tax dedicated solely to funding the operating and maintenance expenses related to operation of the BART to Silicon Valley Extension (the "Extension"). The tax began collection on July 1, 2012, after securing federal and state funding as required by the measure.

The revenues from the 2008 Measure B sales tax are the primary funding source to pay costs incurred by BART in operating and maintaining the Extension as part of the larger BART system. Revenues from 2008 Measure B are also used to fund certain costs incurred by VTA related to the Milpitas and Berryessa stations campuses, parking garages, and other properties and facilities not operated or maintained by BART. These costs fall into categories such as safety/security, insurance, facilities maintenance, professional services, and VTA staff time.

Determination of amounts VTA contributes to BART is governed by the Operations and Maintenance (O&M) Agreement entered into in May 2020. The agreement defines each party's roles, operational and financial responsibilities, and sets out how the costs will be calculated. In the following table, payments to BART are shown as "Contributions to Other Agencies". The remaining expense line items show costs incurred directly by VTA. The FY 2024 and FY 2025 Proposed Budget, shown in the following table, presents the revenues and expenses for the 2008 Measure B Fund.

The forecast for Contributions to Other Agencies reflects the gross request from BART, effectively BART's budget related to operation of the Extension. BART has historically spent moderately less than the amount budgeted. The operating and maintenance costs and capital improvement projects in BART's budget are subject to an annual true-up process, such that only actual costs incurred by BART will be charged to VTA. Any remaining appropriation to BART capital improvement projects will not expire and will be carried over to the subsequent fiscal year.

BART prepared the fare revenue forecasts for the Extension. The fare revenue forecast assumes continued recovery of ridership on the BART system, following significant declines in ridership as a result of the COVID-19 pandemic and on-going loss of work-day commuters.

The FY24 and FY25 Proposed Budget also includes a capital project administered by VTA. The table on the following page shows the capital budget appropriation requested for FY 2024 and FY 2025 and is followed by a brief project description, funding sources, and potential operating cost impact. Capital project funding for the two-year period is appropriated in FY 2024 in order to facilitate administration of the program. Capital project appropriations do not expire at the end of the fiscal year and are carried forward until the project is completed.

2016 Measure B Program

2016 Measure B Program

Overview

On November 8, 2016, the voters of Santa Clara County approved 2016 Measure B, a 30-year, one-half cent countywide sales and use tax to enhance transit, highways, expressways and active transportation (bicycles, pedestrians, and Complete Streets). The measure passed by nearly 72%, the highest level of support for any Santa Clara County transportation tax. Collection of the tax began on April 1, 2017.

The 2016 Measure B ballot measure identified nine program categories that use either of two different methodologies for the purpose of allocating funds:

Formula-based Program Categories

- Local Streets and Roads
- Bicycle and Pedestrian
- Transit Operations

Need/Capacity-based Program Categories

- BART Phase II
- Caltrain Grade Separation
- Caltrain Corridor Capacity Improvements
- Highway Interchanges
- County Expressways
- SR 85 Corridor

The Proposed FY 2024 and FY 2025 2016 Measure B Program Fund Budget on the following page represents the anticipated program revenues, and expenditures by program category over the next two fiscal years. This budget reflects the programming and allocation to be considered by the VTA Board of Directors at its May 4, 2023, meeting. Funding for the two-year period is appropriated in FY 2024 in order to facilitate administration of the program. Similar to a capital budget, appropriations for the program will not expire at the end of the fiscal year and will be carried forward until the 2016 Measure B Program is completed.

VTA Transit Fund Unrestricted Net Assets/Reserves

The VTA Transit Fund currently maintains three reserve accounts, and intends to create a new Capital Fund reserve account, as described below:

<u>Operating Reserve</u>

It is the policy of VTA to accumulate a prudent level of reserves by building and maintaining an Operating Reserve equal to 15% of the annual operating budget for the VTA Transit Fund. The purpose of this reserve is to ensure that sufficient funds are always available in the event of either unavoidable expenditure needs or unanticipated revenue shortfalls from sources other than sales tax-based revenues. The Board formalized this long-standing practice with adoption of the VTA Transit Fund Operating Reserve Policy on April 5, 2012.

<u>Sales Tax Stabilization Fund</u>

The Sales Tax Stabilization Fund reserve was created by the Board as part of the FY 2012 and FY 2013 Biennial Budget adoption on June 2, 2011 to mitigate the impact of the volatility of sales tax-based revenues on service levels and the operating budget. Per the Board policy adopted on April 5, 2012, this reserve carries a maximum balance of \$35 million.

<u>Debt Reduction Fund</u>

The Debt Reduction Fund was established by the Board on February 7, 2008. Per the Board policy also approved at the same time, this fund may be used to reduce long-term liabilities or provide funding for approved transit-related capital improvements and replacement of capital assets. This reserve is used primarily to fund the local portion of the VTA Transit capital program in order to keep assets in a state of good repair.

<u>Capital Fund</u>

The Capital Project Budget previously has been funded from the Debt Reduction Fund. As part of this Biennial Budget process, VTA intends to establish a new Capital Fund to fund Transit capital projects. The reserve will be funded from the remaining Operating Balance, after the required 15% Operating Reserve is met.

Other Designated Funds

In addition to the reserve accounts listed above, there are three other components to the Unrestricted Net Assets that have been restricted by board resolution, contractual requirements,

Local Share of Capital Projects

This designation represents funds previously appropriated for and committed to capital projects. Per VTA Budget Resolution, "Capital appropriations, which are not expended during the fiscal year, shall carry over to successive fiscal years until the projects are completed or otherwise terminated." The Local Share of Capital Projects designation represents the locally funded portion of this carryover. The Budget Resolution also states that "The locally funded portion of the VTA Transit Fund capital appropriation carry over shall be set-aside as a designation of Unrestricted Net Assets in the Annual Comprehensive Financial Report."

Inventory and Prepaid Expenses

This component of net assets represents the value of parts inventory and the prepayment of expenses which are not liquid or otherwise unavailable for use.

Unrestricted Net Assets Status

The table below shows the Unrestricted Net Assets as reported in the FY 2022 Annual Comprehensive Financial Report as well as the projected balances for FY 2023 through FY 2025.

Fund	FY22 Ending Balance	FY23 ¹ Projected Ending Balance	•	FY25 ¹ Projected Ending Balance
Reserves:				
Operating Reserve	81,577	84,230	87,537	90,026
