

FACT SHEET: Transit-Oriented Development

Milpitas Transit Center

Overview

The Milpitas Transit Center Transit-Oriented Development site is located at the corner of Montague Expressway and E. Capitol Avenue. The 1.7-acre site has the potential for a Transit-Oriented Development (TOD), which may include high-rise mixed-use development designed with residential, commercial, and amenity spaces within walking distance of public transit. It is currently unused, vacant land. The site is directly adjacent to the Milpitas Transit Center, providing connections to the following services: VTA light rail and frequent/local buses, BART, AC Transit, and Milpitas SMART.

Transit-Oriented Development

VTA's Transit Oriented Development Program works with municipal, non-profit, and private partners to encourage development of housing, commercial, and employment centers in places that will help increase transit ridership and contribute to a vibrant community. Among VTA's Transit Oriented Development requirements is that 25% of housing on a particular site must be affordable.

This development will align with VTA's Transit Oriented Communities (TOC) Policy which outlines the Program's principles and approach.

Objectives

- Prepare the site for future Transit-Oriented Development, beginning with community engagement
- Encourage development, including affordable housing opportunities near transportation
- Promote urban design that enhances pedestrian walk-ability, bike access, and connectivity to transit
- Increase long term revenue for transit operations

Outcomes

- Housing near transit stations that serve households at all income levels, which helps address the regional housing crisis
- Environmental and public health benefits, including cleaner air and lower greenhouse gas emissions
- Increase transit ridership and reduce auto dependence, which helps to relieve traffic congestion

- Enhance economic competitiveness – TOD locations are attractive to employers
- Neighborhood and fiscal benefits – TODs can create significant household savings (people living near transit spend less on transportation costs)

Benefits of Transit Oriented Development

- Meet Housing Demand – Helps address the regional housing crisis
- Environmental and Public Health Benefits
- Reduce Auto Dependence - TODs reduce auto dependence and lower parking needs
- Economic Competitiveness – TOD locations are attractive to employers
- Neighborhood and Fiscal Benefits – TOD can create significant household savings (people living near transit spend less on transportation costs)

Project/Development Schedule

VTA is working to develop a vision in collaboration with the community. There is no specific project currently proposed for this location.
